This campaign is supported by contributions from Janssen: Pharmaceutical Companies of Johnson & Johnson and Otsuka America Pharmaceutical, Inc.
The 2019 Back to School Toolkit is designed for MHA Affiliates, advocates, and organizations of all types to use with parents, youth and school personnel to raise awareness of the importance of mental health issues that start during the youth.

By using the toolkit materials, you will help members of your community:

- Be aware of the relationship between stress, loneliness, and mental health problems in youth;
- Learn strategies for combatting stress and loneliness in children and teens; and
- Access resources for screening, next steps, and help in times of crisis.

This year’s toolkit includes:

**Media Materials**
- Key Messages
- Drop-In Article
- Radio PSA Scripts

**Social Media Components**
- Sample Post Language
- Social Media Images for Sharing
- Profile and Cover Images for Social Media

**Handouts/Posters**
- Is Your Child Stressed Out?
- Is Your Child Lonely?
- Are You Stressed Out? - For Children and Teens
- Loneliness is Hard - For Children and Teens
- Poster: How Does Stress Feel?
- Poster: You Don’t Have to Be Alone to Feel Lonely

In addition to the materials included in this toolkit, MHA has created a wealth of web content for young people and adults that can easily be linked to and shared in electronic newsletters and over social media.

**Questions?**

If you have further questions about Back to School, please contact Danielle Fritze, Associate Vice President of Public Education and Design at dfritze@mentalhealthamerica.net.
Mental Health America (MHA) has developed its 2019 Back to School Toolkit to help increase understanding of stress and loneliness in children and teens and is providing materials on the topic for parents, school personnel, and young people.

It’s important for parents, caregivers, and school personnel to know the signs that a young person is struggling with his or her mental health and be willing to help.

Stress is more common in teens than many realize, and can impact academics, sports and family life.

While most kids and teens aren’t dealing with bills, difficult bosses, and frustrating commutes, there are plenty of situations that can cause them stress. Things like getting good grades, preparing for the future, loneliness and body appearance all are topics that many cite as causing stress.

Other factors that may cause stress in teens can be when they have to help care for family members, if they are worried about their physical safety, or if family finances are tight.

When a teen’s stress starts impacting their sleep, when they seem to be getting physically sick more often, when they seem sad and withdrawn – it could be more than typical teen angst.

Nearly half of Americans also report sometimes or always feeling lonely. Children, adolescents, and teens are no exception.

It’s normal to feel lonely sometimes, but when you are lonely a lot, it can affect you in a number of ways. Research shows that chronic loneliness can translate to poor sleep, high blood pressure, greater risk of suicidal ideation, and even alcohol and drug use.

If a young person continues to feel overwhelmed, unable to cope and feel as though their stress or loneliness is affecting how they function every day, they may be experiencing the first signs of a mental health condition, like depression or anxiety.

No one has to suffer in silence. Teens can take the youth screen at www.mhascreening.org to see if they may be at risk. Parents who are concerned can take the parent survey. Once you get the results, MHA will provide you with more information and help you to figure out next steps.

Feel free to supplement these key messages with language from the fact sheets and other materials included in this toolkit.
Summer is wrapping up, and many are prepping to get back in the swing of things with school. If the thought of going back to school fills you with dread and anxiety, you’re not alone.

If something just doesn’t “feel right” and you aren’t sure why, you may be dealing with a mental health condition.

Did you know that half of all mental health disorders begin by the age of 14, and about 75 percent begin by the age of 24? But it’s also important to know that mental health issues are common and treatable.

Stress and loneliness can also impact your school year. While you aren’t necessarily dealing with bills, difficult bosses, and frustrating commutes, there are plenty of situations that can cause stress. Things like getting good grades, preparing for the future, loneliness and body appearance all are things that can cause stress. When your stress starts impacting sleep or what you are eating, when you can’t that sad feeling – it could be something more serious.

It’s also normal to feel lonely sometimes, but when you are lonely a lot, it can affect you in a number of ways. Research shows that chronic loneliness can translate to poor sleep, high blood pressure, greater risk of suicidal ideation, and even alcohol and drug use.

Mental Health America (MHA) has also developed tools and resources to help increase your understanding of stress and loneliness and is providing materials on the topic for you, parents, and school personnel.

Don’t suffer in silence! It’s important to know the signs and symptoms of mental health issues and seek help. Free, confidential, and anonymous screening tools are available at www.MHAScreening.org to check in on your symptoms and to find resources to help.

While you do not get to choose what happens to you, you do get to choose how you respond. Learn more at www.mentalhealthamerica.net/back-school. This school year make smart choices about how to deal with stress and loneliness - and learn why your mental health matters.

Just like physical health, taking care of mental health struggles early can help to prevent more serious problems from developing in the future. If you are concerned that you or someone you know may be experiencing a mental health problem, it is important to act before Stage 4. Start the conversation. Seek help from a trusted adult. Remember there is nothing to be ashamed of and that there is help and hope. Don’t know how to start the conversation? MHA has tips and information to help get you started at bit.ly/tips4talking.

There are also serious signs that someone is in crisis and needs more immediate help. These include thoughts or plans of hurting oneself or another person. If you or someone you know is in crisis call 1-800-273-TALK (8255), text “MHA” to 741741, or call 911.
As a new school year begins, you may be feeling stressed out. It’s common to be stressed or lonely, but when it’s all the time - it’s important to seek help.

Mental Health America has developed tools and resources about the impact of stress and loneliness on students. Visit www.mentalhealthamerica.net/back-school to learn more.

Summer’s wrapping up, and many are heading back to school. If the thought of going back to school fills you with dread, you’re not alone.

The 2019 #BackToSchool toolkit is here! This year’s toolkit includes:

• 4 fact sheets
• Key messages
• Sample social media posts/graphics
• A drop-in article
• Radio PSA scripts
• And more!

Download the toolkit here: [http://www.mentalhealthamerica.net/back-school]

Did you know that left unaddressed, chronic loneliness can cause the same amount of damage to your lifespan as smoking 15 cigarettes a day?

Download the 2019 #BacktoSchool toolkit to learn more: [http://www.mentalhealthamerica.net/back-school]

They may look fine, but many children/teens feel stressed and lonely. Learn more about how stress and loneliness can impact not just a young person’s #mentalhealth, but their overall wellness, too. Download the 2019 #BackToSchool toolkit: [http://www.mentalhealthamerica.net/back-school]

Nearly half of 11-17 year olds are very stressed out. The top reason for their stress was getting good grades. So, how can school personnel and parents better support young people’s #mentalhealth? Download the 2019 #BackToSchool toolkit to find out: [http://www.mentalhealthamerica.net/back-school]

Top 5 Ways Teens De-Stress
• Listen to music
• Browse online/social media
• Eat
• Watch movies/TV
• Play video games

Learn more about the impact of stress on #mentalhealth & what teens are doing about it with the 2019 #BackToSchool toolkit: [http://www.mentalhealthamerica.net/back-school]

83% of teens say they do not have an adult in their life who understands what they are going through. How can adults better support the young people in their lives? Learn more with the 2019 #BackToSchool toolkit: [http://www.mentalhealthamerica.net/back-school]

Only 16% of kids thought they had an adult in their life that truly understands what they’re going through. How can you better support a young person in your life who might be struggling? Learn more in our 2019 #BackToSchool toolkit: [http://www.mentalhealthamerica.net/back-school]
Top 5 Causes of Stress in Teens
- Getting good grades
- Appearance/body image
- Preparing for the future
- Loneliness
- Juggling priorities

Learn more about teen mental health with the 2019 #BackToSchool toolkit: [http://www.mentalhealthamerica.net/back-school]

Hashtags

Best practices:
- For Facebook and Twitter, use no more than one or two strategic hashtags per post.
- For Instagram use at least 10 hashtags per post.

Here are our suggested hashtags for this year’s Back to School campaign:
- #backtoschool
- #backtoschool19
- #backtoschool2019
- #student
- #studentmentalhealth
- #teenmentalhealth
- #mentalhealth
- #mentalhealthawareness
- #mentalillness
- #stress
- #lonely
- #loneliness
- #school
- #b4stage4
Download and save the images provided for use on your social media platforms or websites. All images (including social media profile and cover pics, screening buttons and the infographic) can be downloaded by visiting www.mentalhealthamerica.net/back-school-2019-toolkit-download, then right-clicking on the image and selecting “Save image as.”

IS YOUR CHILD STRESSED OUT?

Everyone experiences stress. Stress is how the body handles life's challenges—chemicals are released to increase certain bodily processes and decrease others so we can react quickly and effectively during dangerous or high-pressure situations. Sometimes being under stress can lead to good results for your child or teen, even if it makes them uncomfortable at the moment. For instance, cramming for a test can be stressful, but lead to a better grade. Or the stress of being down a few goals in a soccer game can cause a surge in performance to score more points. These stress reactions usually don't last long, and your child or teen's body can return to normal relatively quickly. But if stress doesn’t let up, then the body doesn’t get the break it needs – and mental and physical health can be affected.

While most kids and teens aren’t dealing with bills, difficult bosses, and frustrating commutes, there are plenty of situations that can cause them stress. Some stress may seem just a part of growing up, but there are also children and teens who are dealing with more serious stressors.

48% of 11-17 year olds surveyed by MHA felt that they were VERY stressed out.

WHAT IS STRESSING CHILDREN AND TEENS THE MOST?

Mental Health America surveyed 11-17 year olds who came to MHAScreening.org about what was stressing them out. Here’s are the top 5 things that caused them stress.

76% GETTING GOOD GRADES 76% PREPARING FOR THE FUTURE
68% LONELINESS 62% BODY APPEARANCE 61% JUGGLING PRIORITIES (School, sports, jobs, clubs, etc.)

SIGNS OF STRESS

Survey takers said they knew their stress levels were getting out of control when they experienced wanting to be alone, wanting to sleep all the time, and/or losing their temper quickly.

Here are some other things to look out for in your child or teen that signal they are feeling stressed-out:

• Headaches or other unexplained aches and pains
• More frequent visits to the school nurse
• Getting colds more than usual
• Feeling sad or moody
• Seeming “burned out”
• Sounding defeated when talking about challenges

• Trouble sleeping
• Changes in appetite
• Fighting with family and friends
• Trouble thinking clearly
• Acting nervous or anxious

If your child or teen has one or more of these symptoms, be alert. They could be signs of a physical illness coming on. If not, it’s time to find out what is happening in your child or teen’s life, and whether they are getting stressed out. Get tips for talking to your child or teen at bit.ly/startmhconvo.
HELPING CHILDREN AND TEENS MANAGE STRESS

You might not be able to stop what is stressing your child or teen, but you can help them. If you notice that they’re showing signs of stress, try the following:

REMEMBER THEM TO BE KIND TO THEMSELVES.

No one is perfect. No one gets it right all the time. No one always has all the answers. If they are trying hard and doing their best, that’s what is important.

HELP THEM MANAGE THEIR TIME.

If they feel overwhelmed with all that they need to get done, help them to set a schedule and set small goals and break down tasks into manageable chunks. If they still feel overwhelmed, it may be necessary to cut out some activities.

DON’T FORGET THE BASICS.

Feed them healthy foods, and limit caffeine and sugar. Encourage them to go to bed by a certain time so they get enough sleep for the following day.

LOOKOUT FOR SIGNS OF SUBSTANCE USE.

Teens especially may turn to drugs, alcohol, or vaping to cope with stress. If you find out that your child or teen has, remind them that substances won’t solve anything and may lead to bigger problems, and keep a close eye on their behavior.

LET THEM KNOW IT’S OK TO “LET IT OUT.”

They may need to cry or have a good laugh. Laughing and crying can both help release the feeling of pent up emotions.

HELP THEM RELAX.

Relaxing is essential for everybody’s physical and mental health. Find out what really helps them relax and encourage them to spend at least half an hour each day doing it. It might be curling up with a good book, going on a bike ride, or listening to music.

TELL THEM YOU LOVE THEM.

Children and teens may stress themselves out because they feel as though they need your approval. It’s important that they know you will love them no matter what.

REMIND THEM THAT IT’S OK TO ASK FOR HELP.

No one should suffer in silence and knowing when to ask for help is a strength, not a weakness. Make sure they know that you are there to talk if they need you and be open to finding additional help through school counselors or mental health professionals if problems with stress continue.

WHERE CAN YOU GET MORE HELP?

If you have worked with your child or teen to help them manage their stress, but they still seem to be struggling, they may be experiencing the early signs of a mental health condition.

HALF OF ALL MENTAL HEALTH DISORDERS START BY AGE 14.¹

Take the parent screen at MHAScreening.org to see if your child or teen may be at risk. Once you get the results, MHA will provide you with more information and help you to figure out next steps.

SOURCES

IS YOUR CHILD LONELY?

NEARLY HALF of Americans report often feeling alone (46%) or left out (47%).

CHILDREN AND TEENS ARE NO EXCEPTION.

OVER 2/3 of 11-17 year olds surveyed by MHA felt stressed out about loneliness.

IS YOUR CHILD LONELY?

NEARLY HALF of Americans report often feeling alone (46%) or left out (47%).

CHILDREN AND TEENS ARE NO EXCEPTION.

OVER 2/3 of 11-17 year olds surveyed by MHA felt stressed out about loneliness.

EFFECTS OF LONELINESS

Research shows that chronic loneliness has the following effects: ²

• Increased levels of cortisol, the stress hormone
• Less restful sleep
• Negative impact on physical health (more than smoking or obesity)
• Headaches or other unexplained aches and pains
• Poor self-care (grooming, hygiene, diet)
• Higher likelihood of alcohol or drug use
• Depression
• Anxiety
• Negative outlook on life
• Poor self esteem
• Greater risk of suicide

Furthermore, the same part of the brain that reacts to physical pain is activated by social rejection. ³

COMMON CAUSES OF LONELINESS

Certain life circumstances may cause children and teens to feel lonely, such as:

• Moving to a new neighborhood
• Changing schools
• Divorce
• An older sibling leaving home
• Being “single” when their friends have boyfriends or girlfriends
• Fights with friends
• Being bullied
• Death in the family

EFFECTS OF LONELINESS

Research shows that chronic loneliness has the following effects: ²

• Increased levels of cortisol, the stress hormone
• Less restful sleep
• Negative impact on physical health (more than smoking or obesity)
• Headaches or other unexplained aches and pains
• Poor self-care (grooming, hygiene, diet)
• Higher likelihood of alcohol or drug use
• Depression
• Anxiety
• Negative outlook on life
• Poor self esteem
• Greater risk of suicide

Furthermore, the same part of the brain that reacts to physical pain is activated by social rejection. ³

COMMON CAUSES OF LONELINESS

Certain life circumstances may cause children and teens to feel lonely, such as:

• Moving to a new neighborhood
• Changing schools
• Divorce
• An older sibling leaving home
• Being “single” when their friends have boyfriends or girlfriends
• Fights with friends
• Being bullied
• Death in the family

SIGNS OF LONELINESS

YOUNGER CHILDREN MAY:

• Create imaginary friends to make up for lack of real friends
• Seem clingy or start asking you to play with them more than usual
• Seek your attention by misbehaving, acting silly, or interrupting you when they know they shouldn’t
• Act timid or unsure of themselves
• Cry more often than other children their age

ADOLESCENTS AND TEENS MAY:

• Retreat to their rooms for long periods of time
• Start talking to you more than usual
• Seem sad
• Appear to not have friends to hang out with outside of school
• No longer hang out with friends that they used to spend a lot of time with
• Talk negatively about themselves

By contrast, if your child or teen seems to be spending a lot of time alone, they may not actually be lonely. There are some children and teens who enjoy reading or popping in a pair of earbuds to listen to music over trips to the mall or parties. The easiest way to figure out if your child or teen is just introverted or whether they are lonely is to ask.
GOING ONLINE: A DOUBLE-EDGED SWORD

Most people who are parents and teachers didn't grow up using the internet the way children and teens do now. Between social media, gaming, and general internet use, there are a lot of ways that being online can impact loneliness, for better or for worse.

SOCIAL MEDIA

Fifty-seven percent of teens say they have met a new friend online and 68% of teen social media users said they received support from others during challenging or tough times. However, not all social media use is good for teen friendships.

While less than a quarter (24%) of teens find social media to have a mostly negative effect on their lives, 27% of those say that social media has caused them to be bullied or affected by rumor spreading, which can cause loneliness. Another study found that of teens who use social media, 53% said they saw people posting about events that they weren’t invited to.

GAMING

If your child or teen seems to be spending a lot of time gaming, they may actually be socializing in their own way. While virtual friendships can never replace face-to-face interactions, many teens go online to communicate with existing friends outside of school and make new friends.

Both boys and girls say that they have met new friends while playing games online, with over 4x as many boys doing so than girls. Furthermore, 78% of teen gamers say that playing online makes them feel closer to friends that they already know.

HOW CAN YOU HELP?

If you suspect that your child or teen is struggling with loneliness, the best way to figure out for certain is to start a conversation and ask. If loneliness is a problem, here are some things you can do to help:

Talk to them about their interests. Find out what they enjoy and then look into groups or classes that they may be able to join to further explore those interests.

Try recreational sports. Rec sports teams give your child or teen the chance to meet a group of their peers that may not necessarily go to the same school as them.

See what your faith community has to offer. There may be youth groups or classes during worship services that your child or teen could become part of.

Make time for extended family. If your child or teen has cousins or other relatives around their age that are within a reasonable distance, set up time for them to get together.

WHERE CAN YOU GET MORE HELP?

Long-term loneliness can lead to the development of mental health conditions like anxiety or depression if not addressed early. If you suspect that your child or teen is already experiencing signs of a mental health condition, take the parent screen at MHAScreening.org.

It’s free, confidential, and anonymous. Once you get the results, MHA will provide you with information and resources to help guide you through next steps.

⁶Teens, Technology & Friendships (Pew Research Center 2015)
⁷Ibid.
Sometimes being young isn’t all that great. Your parents are getting on your case, and your friends are being weird or maybe you just feel like you have too much to do and not enough time to do it.

Now your stomach hurts, you can’t concentrate in school, and the smallest things get on your nerves. You’re probably stressed out.

**WHAT IS STRESS?**

Stress is a reaction that you feel in response to pressures in your life. You are taking a test. You find yourself in an unfamiliar situation. You’re rushing from one thing to the next. In each case, the pressure is on and you may feel the effects in your mind and body. That’s stress.

Not all stress is bad. Stress can rev you up and give you more energy to handle a situation. That’s the way that your body makes sure you will come out ok. Stress is a normal part of life, especially when you are going through lots of changes or aren’t sure about how things will turn out.

Stress can become a bad thing when you feel it all the time. This means that your body is working extra hard and isn’t getting the break it needs to recover.

**HOW DOES STRESS FEEL?**

Learning how your body reacts when you become stressed and looking for those signs in the future can help you reduce the physical effects.

Here are the common signs of stress:
- Feeling angry, irritable or easily frustrated
- Trouble sleeping or wanting to sleep all the time
- Losing your temper with others
- Headaches or other unexplained aches and pains
- Changes in appetite or eating habits
- Getting colds more than usual
- Fighting with family and friends
- Trouble concentrating or thinking clearly
- Feeling sad or moody
- Feeling nervous or anxious
- Feeling that you can’t handle life’s challenges
- Not wanting to be around people or take part in activities

If you’re having any of these symptoms, it’s important that you take care of yourself.

**WHAT IS STRESSING PEOPLE OUT MOST?**

Mental Health America surveyed 11-17 year olds who came to MHAScreening.org about what was stressing them out. Here’s are the top 5 things that caused them stress.

- Getting Good Grades: 76%
- Preparing for the Future: 76%
- Loneliness: 68%
- Body Appearance: 62%
- Juggling Priorities (School, sports, jobs, clubs, etc.): 61%
You might not be able to change what is stressing you out, but you can control how you react and respond to stress. If you notice that you’re showing signs of stress, here are some things you can do to help yourself:

**LEAVE THE ROOM.**
Getting up and removing yourself from the stressful situation can be a huge help. A brief change of scenery can help put some distance between you and your feelings. If you’re in class, take a quick walk to the bathroom. Buried in homework? Take 60 seconds to walk to the kitchen for a glass of water.

**ORGANIZE.**
Pick something small: your desk, your closet, or your to-do list are all great choices. Spend 20 minutes focused on tidying up—it will help you feel in control of something and give you a sense of accomplishment.

**DO SOME BREATHING EXERCISES.**
Think about how you breathe when you’re relaxed—like when you’re about to fall asleep. Slow and deep, right? Forcing yourself to breathe this way is one of the best ways to bring on calmer feelings. Breathe2Relax and Breath are two good apps for guided breathing exercises.

**EXERCISE.**
One of the best ways to handle built-up stress is to physically release it. Lace up your sneakers and head outside for a run—your feet pounding against the ground is sure to help you get some frustration out.

**WRITE DOWN 3 THINGS YOU ARE GRATEFUL FOR.**
Showing gratitude is known to improve mood and help you better handle adversity—so not only is it a good way to reduce your immediate stress, but it can help you keep your future stress level down, too. And when you write down a few things you’re thankful for, you can always look back at your list when you start to feel that stress bubbling up again.

**WRITE IT OUT.**
When your feelings start to bubble up and get overwhelming, putting them on paper can help you untangle them. Try a stream of consciousness exercise: 10 minutes of writing down all your thoughts without hesitating. Or make a list of things stressing you out—seeing them reduced to bullet points can help you think more clearly.

**TALK IT OUT.**
Sometimes when we’re stressed, everything little problem seems like a big deal. Talking to a friend, parent, teacher, coach, or someone else you trust can help you get out of your own head and see things from a different point of view. Try using the NotOK app to help you reach out to others when you’re feeling overly stressed. Visit bit.ly/tips4talking for tips on how to start the conversation.

**WATCH SOMETHING FUNNY.**
Putting on a funny show or video will help take your mind off of everything going on for a little bit. And laughter really can be the best medicine! It’s known to reduce stress hormones, improve mood, and bring on feelings of relaxation.

**MEDITATE.**
Meditation triggers your body’s “relaxation response”—the complete opposite of the common stress response of “fight or flight.” It slows your breathing, blood pressure, and pulse—all things that go along with being in a calm state of mind. Some apps you can try to help you meditate are Calm, Sanvello, and Headspace.

If you still feel overwhelmed, unable to cope and feel as though your stress is affecting how you function every day, you may be experiencing the first signs of a mental health condition, like depression or anxiety. Take the youth screen at MHAScreening.org to see if you may be at risk. Once you get the results, MHA will provide you with more information and help you to figure out next steps.

If you take steps to feel less lonely but find yourself still struggling to deal with day-to-day life, you may be experiencing the first signs of a mental health condition, like depression or anxiety.

Take the youth screen at MHAScreening.org to see if you may be at risk. Once you get the results, MHA will provide you with more information and help you to figure out next steps.
FIGURE OUT IF SOMETHING IS MISSING IN YOUR LIFE.

There are a lot of different ways to feel lonely. Maybe you have a great group of friends, but wish you had one best friend to go to for everything. Or maybe you have one amazing friend, but miss being part of a group. Knowing what's missing won't magically make it appear, but it will make the overwhelming feeling of loneliness seem a bit more manageable and give you something to work toward.

HELP OTHERS.

Volunteering is a great way to form meaningful connections with others and make new friends. It is also a natural way to add some purpose to your life—something a lot of us struggle with when feeling lonely. What are some causes that you're passionate about? Does your place of worship have volunteer activities? Is there a service club through your school?

TRY SOMETHING NEW.

Is there something you've always wanted to try, but never have? Now is the perfect time! If you're interested in acting, try auditioning for a school play or a local theater group. Love sports? Join a new team, or maybe there's a weekend clinic you can sign up for. There are tons of potential new hobbies out there!

MAKE TIME FOR EXTENDED FAMILY.

If you have cousins or other relatives around your age that are within a reasonable distance, reach out and try to get together.

RECONNECT WITH OLD FRIENDS.

Have you lost touch with a good friend from elementary school? Or maybe a friend from summer camp? See if you can reconnect! Especially if you're at a new school this year—just because you don't see someone every day doesn't mean they can't be a valuable friend.

WATCH SOMETHING THAT MAKES YOU LAUGH.

Put on your favorite funny show or movie—immersing yourself in a world with familiar characters can make you feel less alone.

TURN ACTIVITIES YOU DO ALONE INTO GROUP ACTIVITIES.

Into gaming? Invite someone over to play with you in person. Do you like to draw? Ask your parents to help you find an art class. Going to a baseball game with your family? See if they can get an extra ticket so you can invite a friend.

SPEND TIME WITH ANIMALS.

Hanging out with pets, especially cats and dogs, is a great way to feel less lonely. They will love you unconditionally and will provide you with all the snuggles you need! If you don't have pets of your own, see if your neighbors or relatives would be willing to let you hang out with theirs.

TRY AN APP.

Lyf is an app that helps you reach out to others to chat about things. Q Chat has support groups for LGBTQ youth. NotOK is an app that helps you reach out to contacts that you select to let them know that you are struggling. 7 Cups has trained listeners to provide you with emotional support.

WRITE DOWN 5 THINGS YOU LOVE ABOUT YOURSELF.

Part of the pain of loneliness is that you start to think of yourself negatively. Taking a few minutes to write down the good things you notice about yourself is a simple way to boost your self-esteem and remind yourself that you are awesome in your own way.

IN CRISIS?

Trained crisis counselors are available 24/7 by texting "MHA" to 741-741 or calling 1-800-273-TALK(8255).
If you feel overwhelmed, unable to cope and feel as though your stress is affecting how you function every day, you may be experiencing the first signs of a mental health condition, like depression or anxiety.

Take the youth screen at MHAScreening.org to see if you may be at risk. Once you get the results, MHA will provide you with more information and help you to figure out next steps.
WHEN YOU’RE LONELY A LOT, IT CAN AFFECT YOU IN MANY WAYS. YOU MIGHT:

► FEEL MORE STRESSED;
► SLEEP, BUT NOT FEEL RESTED;
► STOP TAKING GOOD CARE OF YOUR APPEARANCE OR HYGIENE;
► FIND THAT YOUR OUTLOOK ON LIFE HAS BECOME NEGATIVE;
► START SHOWING SIGNS OF DEPRESSION OR ANXIETY; OR
► TURN TO DRUGS OR ALCOHOL TO FEEL BETTER.

If you take steps to feel less lonely but find yourself still struggling to deal with day-to-day life, you may be experiencing the first signs of a mental health condition, like depression or anxiety.

Take the youth screen at MHAScreening.org to see if you may be at risk. Once you get the results, MHA will provide you with more information and help you to figure out next steps.
